

Logistics Management Information Packaging Data Products

I. Packaging/Logistics Data Entry-

- Nomenclature
- National Stock Number (NSN)
- Item part number
- Packaging Data Preparer - Code identifying CAGE code of Contractor preparing data.
- Shelf life code - Code identifying shelf life of packaged item
- Shelf Life Action Code
- Item weight
- Item length
- Item width
- Item depth
- Unit pack weight
- Unit pack length
- Unit pack width
- Unit pack depth
- Unit pack cube
- Unit of Issue (UI)
- Packaging Category Codes
- Special Marking codes
- Quantity per unit pack
- Quantity per intermediate pack
- CAGE code associated with Item part number
- Preservation method Code
- Cleaning method code
- Preservative material code
- Wrap material code
- Cushioning material code
- Cushioning thickness code
- Unit container code
- Intermediate container code
- Unit Container Level Code
- Packing requirements code

Hazardous material code Enter the hazardous material code.

Hazardous Material Code

N Item is not hazardous for transport.

H Item is hazardous for transport. Hazardous material is any material or substance which is capable of posing an unreasonable risk to health, safety, or property when transported in commerce. For background see: International Maritime Dangerous Goods Code, INTERNATIONAL MARITIME ORGANIZATION; Technical Instructions for Safe Transport of Hazardous Goods, INTERNATIONAL CIVIL AVIATION ORGANIZATION; Title 29 (Labor), 40 (Protection of Environment) and 49 (Transportation), CODE OF FEDERAL REGULATIONS; and Recommendations on the Transport of Dangerous Goods, UNITED NATIONS.
